

Reimbursement Codes

For Use with the BVA-100® Blood Test

Direct Measurement of Total Blood, Plasma, and Red Cell Volume Administered at Point of Care, Samples Lab Processed
The BVA-100 Blood Test is Reimbursed by CMS and Most Commercial Insurers in Inpatient, Outpatient Settings, or Place of Service

Technical description: The BVA-100 test utilizes HSA I-131 to make a measure of patient plasma volume utilizing multiple samples for accuracy. The test measures patient total plasma volume and provides a derivative calculation utilizing an input of the patient's hematocrit to impute a patient's red cell volume and total blood volume when hematocrit is provided as well as a tracer transudation rate.

Blood Volume Analysis Codes

A9524	Iodine I-131 iodinated serum albumin, diagnostic, per 5 µCi Volumex™ is a single-unit dose of 25 µCi. Bill A9524 once & enter "5" in "units" column for full reimbursement of the single-dose
78111	Plasma volume, radiopharmaceutical volume-dilution technique (separate procedure); multiple samplings for both technical & professional components
78111-26	Plasma volume, radiopharmaceutical volume-dilution technique (separate procedure); multiple samplings professional interpretation only
78111-TC	Plasma volume, radiopharmaceutical volume-dilution technique (separate procedure); multiple samplings for technical component only
78121	Red cell volume determination (separate procedure); multiple samplings
78121-26	Red cell volume determination (separate procedure); multiple samplings professional interpretation only
78121-TC	Red cell volume determination (separate procedure); multiple samplings technical component only
96374	Therapeutic, prophylactic, or diagnostic injection; intravenous push, single or initial substance/drug

Nuclear Medicine Revenue Codes

0340	General
0341	Diagnostics
0342	Therapeutic
0343	Diagnostic radiopharmaceutical
0344	Therapeutic radiopharmaceutical
0349	Other

Wastage Modifier

A9524-JW	Unused and discarded portion of the single-use Volumex after administration
